

**Abstract:**

Please replace the abstract with the following amended abstract:

~~The present invention relates to a~~ A refrigerator and a method for operating ~~said a~~ a refrigerator with a cooling chamber (2) for accommodating the objects to be cooled and a first cooling ~~means~~ unit (3) in form of an absorption cooling means whose evaporator (5) for cooling ~~said the~~ the cooling chamber is arranged in or on ~~said the~~ the cooling chamber (2), wherein on or in ~~said the~~ the cooling chamber (2) a second cooling ~~means~~ unit (4) operable independently from in particular ~~said the~~ the first cooling means (3), which alternatively and/or additionally cools ~~said the~~ the cooling chamber (2).

## ABSTRACT OF THE DISCLOSURE

A refrigerator and a method for operating a refrigerator with a cooling chamber (2) for accommodating the objects to be cooled and a first cooling unit (3) in form of an absorption cooling means whose evaporator (5) for cooling the cooling chamber is arranged in or on the cooling chamber (2), wherein on or in the cooling chamber (2) a second cooling unit (4) operable independently from in particular the first cooling means (3), which alternatively and/or additionally cools the cooling chamber (2).
